FOREWORD

This study was initiated and funded by the Office of Supersonic Transport Development, Federal Aviation Agency, Washington, D.C. 20553. The Biophysics Laboratory, Aerospace Medical Research Laboratories, Wright-Patterson Air Force Base, Ohio, served as technical monitor. The research was conducted under Contract AF 33(657)-11148 by the National Opinion Research Center, University of Chicago, 55 Fifth Avenue, New York, N.Y. 10003. Mr. Paul N. Borsky was the principal investigator for National Opinion Research Center. Dr. Charles W. Nixon of the Biodynamics and Bionics Division was the contract monitor for the Aerospace Medical Research Laboratories. The work was performed in support of Project No. 7231, "Biomechanics of Aerospace Operations," and Task No. 723103, "Biological Acoustics in Aerospace Environments." The research sponsored by this contract was started in April 1963 and completed in February 1965. This report is the appendix to AMRL-TR-65-37, Volume II, dated October 1965.

ABSTRACT

This appendix contains samples of questionnaires used during the interviews that took place from February to July 1964 in the Oklahoma City, Oklahoma, area. That area was repeatedly exposed to sonic booms generated to simulate overpressure levels that are expected for supersonic transport overflights. The schedule provided for eight sonic booms per day. During the 6-month period, almost 3,000 local residents were interviewed three times to determine the nature and extent of their reactions to the sonic booms.

QUESTIONNAIRE DESIGN

The interview was designed to embed the questions about sonic booms in general context of local living conditions to secure as unbiased a response possible about reactions to the booms. Respondents were told, "This is a community survey of how different people feel about living in different areas. attempts to record systematically the kinds of things people like and dislike about their environments and the kinds of individual and group actions taken to improve undesirable situations."

Sponsorship

At no time was the respondent advised that the study was being made for the government as part of the sonic boom evaluation. If asked about sponsorship, a respondent was told that the National Opinion Research Center of the University of Chicago was conducting the study as part of its regular urban studies. This was done to avoid possible bias in response. A person believing the study was sponsored by the government might have exaggerated his feelings in order to influence the government's decisions. Results indicate that this general approach was successful in over 90% of all interviews; only 8% voiced suspicion about the purposes or sponsorship of the survey.

Order of Questions

The questionnaire was divided into five sequences, as follows:

1. General questions about likes and dislikes and overall rating of the area.
2. Direct questions outlining a pattern of local behavior in response to a major annoyance or dislike.
3. General reaction to perceived noise disturbances and behavior patterns in response to them.
4. Direct questions on topical sonic booms, including knowledge, interferences, annoyance, feelings of importance and necessity, and projected feelings toward civilian jet booms.
5. Background information on the characteristics of the respondent.

Control Over Respondent Biases

As mentioned earlier, the public information program and the resulting news releases openly discussed the purposes of the study, suggested that local economic benefits would result from acceptance of the booms, stressed the daytime nature and 6-month duration of the booms and that NORC would study public reactions. To measure the extent to which the public actually became aware of these messages and to what extent this knowledge influenced reported reactions to the booms, special questions on these topics were incorporated in the personal interviews.

Face-to-Face and Telephone Questionnaires

In the first interview most of the respondents were seen face to face, with a smaller number contacted by telephone. During the second and third interviews, however, all respondents who had a telephone were contacted by phone. Those who had no telephone were visited in their homes. The telephone questionnaire was much shorter than the face-to-face questionnaire. In general, the telephone interview omitted the free-answer questions which required lengthy probing. The remaining questions included on the telephone questionnaire, however, were identical with questions on the face-to-face interview and followed a similar sequence.

Questionnaires used in these interviews were approved by the Bureau of the Budget.

I'm from the opinion research center at the University of Chicago. We are
a study about how people feel about living in different places and I'd like to
ome of your views.

re first question is: In general, how do you like living in this part of
ame of area)? Do you rate it as an excellent, good, fair, poor, or very
oor place to live?

Excellent	10-1
Good.	2
Fair.	3
Poor.	4
Very poor	5
Don't know.	6

. And what are some of the things you like -- things that you feel are
advantages, or that make this a good place to live? (Anything else?)

3. A. Now, very few places are entirely perfect. So I'd like you to tell me if there are many things, a few things or hardly anything you dislike about living around here?

- C. Have we overlooked anything that may recently have bothered or disturbed your everyday living -- even little annoyances that you just take for granted because nothing much can be done about them?

-
4. Are there any dangerous conditions affecting this area that sometimes concern you?

Yes	17-1*
No.	2
NORC use.	Y

- *A. IF YES: What are they? (Anything else?)

5. Now of all the things you don't like (there must be some) -- things you may feel are nuisances, irritations, disturbances, or bothersome conditions, which one thing do you dislike the most?

Nothing disliked.	18-1*
Sonic booms, big booms.	2
Noise - airplane.	3
Noise - other	4
Danger - traffic, no sidewalks.	5
Danger - other conditions	6
Location poor, inconvenient to facilities, jobs	7
Transportation, roads, highways, buses inadequate	8
Schools - buildings, instruction, transportation inadequate	9
Community facilities - other inadequate	0
Social aspects, dislike people, unfriendly.	X
Zoning problems, mixed residence-business	19-1
Overcrowded, not enough privacy, space.	2
Taxes too high, earnings tax unfair	3
Economic problems, no jobs, prices too high	4
Government poor, corrupt, pressure for annexation	5
All other reasons	6

Hello. (Is this the home of _____ at _____?) I'm from the opinion research center at the University of Chicago. We are doing a study of how people feel about living in different places and I'd like to get some of your views.

1. The first question is: In general, how do you like living in your area?
Do you rate it as an excellent, good, fair, or poor place to live?

Excellent	10-1
Good.	2
Fair.	3
Poor.	4
Don't know.	5

2. Now, very few places are entirely perfect. So I'd like you to tell me if there are many things, a few things or hardly anything you dislike about living around here?

Many things	11-1
Few things.	2
Hardly anything	3
Don't know.	4
NORC use.	Y

3. Now of all the things you don't like (there must be some) -- things you may feel are nuisances, irritations, disturbances, or bothersome conditions, which one thing do you dislike the most?

Nothing disliked.	12-1*
Sonic booms, big booms.	2
Noise - airplane.	3
Noise - other	4
Danger - traffic, no sidewalks.	5
Danger - other conditions	6
Location poor, inconvenient to facilities, jobs	7
Transportation, roads, highways, buses inadequate	8
Schools - buildings, instruction, transportation inadequate	9
Community facilities - other inadequate	0
Social aspects, dislike people, unfriendly.	X
Zoning problems, mixed residence-business	13-1

Description
Respondent (Q. 22): _____

Address: _____

Hello. (Is this the home of _____ at _____?) I'm from the opinion research center
at the University of Chicago. We are doing a study of how people feel about living
in different places and I'd like to get some of your views.

1. The first question is: In general, how do you like living in your area?
Do you rate it as an excellent, good, fair, or poor place to live?

Excellent	10-1
Good.	2
Fair.	3
Poor.	4
Don't know.	5
NORC use.	Y

2. Now, very few places are entirely perfect. So I'd like you to tell me if
there are many things, a few things or hardly anything you dislike about
living around here?

Many things	11-1
Few things.	2
Hardly anything	3
Don't know.	4
NORC use.	Y

3. Now of all the things you don't like (there must be some) -- things you may feel are nuisances, irritations, disturbances, or bothersome conditions, which one thing do you dislike the most?

Nothing disliked.	12-1
Sonic booms, big booms.	2
Noise - airplane.	3
Noise - other	4
Danger - traffic, no sidewalks.	5
Danger - other conditions	6
Location poor, inconvenient to facilities, jobs	7
Transportation, roads, highways, buses inadequate	8
Schools - buildings, instruction, transportation inadequate	9
Community facilities - other inadequate	0
Social aspects, dislike people, unfriendly.	X
Zoning problems, mixed residence-business	13-1
Overcrowded, not enough privacy, space.	2
Taxes too high, earning tax unfair.	3
Economic problems, no jobs, prices too high	4
Government poor, corrupt, pressure for annexation	5
All other reasons	6
Don't know.	7
NORC use.	8

IF SOMETHING DISLIKED MENTIONED, ASK E - G ON THE NEXT PAGE

*IF NOTHING DISLIKED OR DON'T KNOW, ASK A

- A. At any time in the past, was there ever anything around here that you felt was a public problem or a nuisance, an irritation, a disturbance, or a bothersome condition?

Yes	14-
No.	1
NORC use.	2

**IF YES, ASK B - D

- B. Did you ever feel like doing something about this? For example, did you ever feel like:

13. ABSTRACT This appendix contains samples of questionnaires used during the interviews that took place from February to July 1964 in the Oklahoma City, Oklahoma, area. That area was repeatedly exposed to sonic booms generated to simulate overpressure levels that are expected for supersonic transport overflights. The schedule provided for eight sonic booms per day. During the 6-month period, almost 3,000 local residents were interviewed three times to determine the nature and extent of their reactions to the sonic booms.

1. ORIGINATING ACTIVITY: Enter the name and address of the contractor, subcontractor, grantee, Department of Defense activity or other organization (*corporate author*) issuing the report.

2a. REPORT SECURITY CLASSIFICATION: Enter the overall security classification of the report. Indicate whether "Restricted Data" is included. Marking is to be in accordance with appropriate security regulations.

2b. GROUP: Automatic downgrading is specified in DoD Directive 5200.10 and Armed Forces Industrial Manual. Enter the group number. Also, when applicable, show that optional markings have been used for Group 3 and Group 4 as authorized.

3. REPORT TITLE: Enter the complete report title in all capital letters. Titles in all cases should be unclassified. If a meaningful title cannot be selected without classification, show title classification in all capitals in parenthesis immediately following the title.

4. DESCRIPTIVE NOTES: If appropriate, enter the type of report, e.g., interim, progress, summary, annual, or final. Give the inclusive dates when a specific reporting period is covered.

5. AUTHOR(S): Enter the name(s) of author(s) as shown on or in the report. Enter last name, first name, middle initial. If military, show rank and branch of service. The name of the principal author is an absolute minimum requirement.

6. REPORT DATE: Enter the date of the report as day, month, year, or month, year. If more than one date appears on the report, use date of publication.

7a. TOTAL NUMBER OF PAGES: The total page count should follow normal pagination procedures, i.e., enter the number of pages containing information.

7b. NUMBER OF REFERENCES: Enter the total number of references cited in the report.

8a. CONTRACT OR GRANT NUMBER: If appropriate, enter the applicable number of the contract or grant under which the report was written.

8b, 8c, & 8d. PROJECT NUMBER: Enter the appropriate military department identification, such as project number, subproject number, system numbers, task number, etc.

9a. ORIGINATOR'S REPORT NUMBER(S): Enter the official report number by which the document will be identified and controlled by the originating activity. This number must be unique to this report.

9b. OTHER REPORT NUMBER(S): If the report has been assigned any other report numbers (*either by the originator or by the sponsor*), also enter this number(s).

10. AVAILABILITY/LIMITATION NOTICES: Enter any limitations on further dissemination of the report, other than those

imposed by security classification, using standard statements such as:

- (1) "Qualified requesters may obtain copies of this report from DDC."
- (2) "Foreign announcement and dissemination of this report by DDC is not authorized."
- (3) "U. S. Government agencies may obtain copies of this report directly from DDC. Other qualified DDC users shall request through _____."
- (4) "U. S. military agencies may obtain copies of this report directly from DDC. Other qualified users shall request through _____."
- (5) "All distribution of this report is controlled. Qualified DDC users shall request through _____."

If the report has been furnished to the Office of Technical Services, Department of Commerce, for sale to the public, indicate this fact and enter the price, if known.

11. SUPPLEMENTARY NOTES: Use for additional explanatory notes.

12. SPONSORING MILITARY ACTIVITY: Enter the name of the departmental project office or laboratory sponsoring (paying for) the research and development. Include address.

13. ABSTRACT: Enter an abstract giving a brief and factual summary of the document indicative of the report, even though it may also appear elsewhere in the body of the technical report. If additional space is required, a continuation sheet shall be attached.

It is highly desirable that the abstract of classified reports be unclassified. Each paragraph of the abstract shall end with an indication of the military security classification of the information in the paragraph, represented as (TS), (S), (C), or (U).

There is no limitation on the length of the abstract. However, the suggested length is from 150 to 225 words.

14. KEY WORDS: Key words are technically meaningful terms or short phrases that characterize a report and may be used as index entries for cataloging the report. Key words must be selected so that no security classification is required. Identifiers, such as equipment model designation, trade name, military project code name, geographic location, may be used as key words but will be followed by an indication of technical context. The assignment of links, rules, and weights is optional.
